How to sharpen a knife

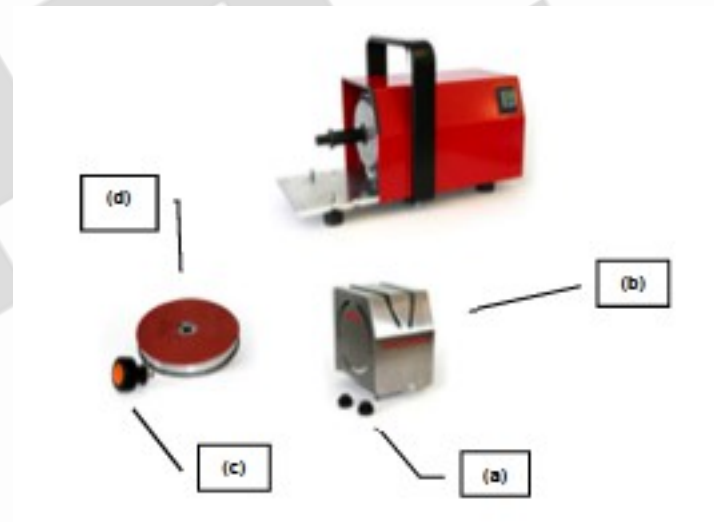

Hold the knife by the handle and insert the edge on the guide, slide in the direction indicated by the arrow all the edge to the point.

Alternatively use the two slots to remove the burrs that appear.

Protect the machine from moisture and dirt.

Best results are obtained in knives with straight edges without water or teeth.

How to replace the wheels

- 1/ Loose the threaded nuts. (a)
- 2/ Lift and remove the sharpening guide.
- 3/ Loose the screw. (c)
- 4/ Replace old grinding wheels (d) with the new ones.
- 5/ Tighten the screw (c)
- 6/ Re-fix the guide (b)
- 7/ Tighten the nuts (a)
