

GPH

SEMI-AUTOMATIC POLISHING MACHINE

Special features

- Clearly arranged
- Easy to operate
- Many kinds of saw blades with different surface can be polished
- Automatic dressing of the polishing wheel
- Variable polishing pressure
- RPM regulated table and polishing wheel drive
- Control panel for parameter input and process indication

Technical description

- One saw blade will be put manually on the table
- Start of the polishing cycle
- All drives will be stopped after the polishing cycle
- The saw blade will be turned over manually

Technical data

- Diameter of saw blades standard: up to 800 mm
- Polishing wheel: max. $\varnothing 400 \times 127 \times (20-50)$ mm
- Machine dimensions: (LxWxH) 1700 x 1500 x 2700 mm

Option

- Water container with magnetic filter and pump
- 2 rotating directions for the table and polishing wheel for polishing of strobe saw blades
- Magnetic table for light grinding operations

Special design on request
