### TECHNICAL DATA

- Saw blade diameters: 170-450 mm
- Saw blade thickness: max 6 mm
- Grinding wheel diameter: 150 mm
- Number of teeth: 20-999
- Indexing speed: 3-75 strokes/minute
- Standard electrics: 220 Volt, 3 phase, 60 Hz
- Dimensions: 68” L x 47” W x 71” H
- Weight: 1800 lbs.

### COMPLETELY REBUILT AND RECONDITIONED

- With electronic control TEMPOTRONIC-ECO for CBN grinding as well as chamfering in one set up.
- Suitable for re-sharpening and manufacturing of circular saw blades
- For blades with tooth forms A, Aw, B, Bw, and C according to DIN 1840
- Cutting and clearance angles freely selectable

### OPTIONS AND ACCESSORIES:

- High pressure coolant facility with paper band filter
- 5/8” centering shaft, positive clamping, saw blade clamping nut
- Automatic central lubrication
- Machine lamp (LED)
- Saw blade clamping assembly 140 mm diameter
- Saw blade clamping assembly 215 mm diameter
- Saw blade clamping assembly 300 mm diameter
- Set of tools
